

Record Your On-Screen Actions

With SMART Recorder, you can record the entire screen or a rectangular portion of it. SMART Recorder saves recordings in QuickTime .mov format.

To create a recording

1. Open the Start Center and press **Recorder** .

OR

Press and hold the SMART Board icon  in the Dock and select **Open Recorder**.

The SMART Recorder opens.

2. To record the entire screen, press the **Record** button .

OR

To record a specific screen area, press the down arrow beside the **Record** button, select **Record Area** and draw a rectangle around the region you want to record.

As you record, the time elapsed displays below the **Record** button. The colored dot indicates the expected quality of your recording, based on the [current Recorder settings](#).

3. Deliver your presentation. As you do, interact with your computer and [follow these recording tips](#). If you connect a microphone to your computer, Recorder records the audio as well.

4. When you are through recording, Press the **Stop** button .

5. In the dialog that appears, type a file name. If you want to change this file's location, browse to the new location.

6. Press **Save**.

Recorder saves your video file to the location [specified](#). When it's saved, a dialog appears that shows you the file size and time length.

If you don't want to save the recording, press **Cancel** when the dialog appears, and then press **Yes** to confirm the deletion.
